Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The first matter that was discussed was the limitation "configured to", an agreement was reached to change the word to "for". Further, the next limitation that was argued was the "iteratively identifying." The Applicants argue that the prior art reference does not disclose the iteration being done. No agreement was reached as the Su reference suggests a possible iteration and along with the combination of the secondary reference an iterator was used. The final item that was discussed was the rebuilding of the vocabulary after each iteration. It was pointed out that the Su reference added compounds to a compound list based on the likelihood measure calculated. The applicants argued that the vocabulary is not updated after each iteration. The Applicants intend to submit proposed amendments to see whether the claims can overcome the prior art cited .
